

Gummies
I N C

Think Gummies

Think US

Gummies are best & most preferred Dosage format delivering Vitamins and Minerals

Gummies are a tasty-Healthy Way
to take Vitamins

Uniqueness

- It is Healthy & Tasty
- Easy to take with good mouthfeel
- No water required for intake
- Can be consumed at any time of the day with or without meals
- Is for all age group Kids (> 3years & above) and Adults alike
- Better Compliance as a dosage
- Balances daily diet, targeting daily sufficiency of nutrients
- Gummy dose is based on RDA and there is less chance of over dosage
- A prophylactic/maintenance dose can be taken for longer period of time
- Delivers same or even more vitamins as any other supplements/dosage in market

Bioavailability and Bio-absorption

Gummies are first chewed in mouth, where they get mixed with saliva, and hence disintegration of fibre (pectin) based gummies starts in the mouth itself. So once gummyvitamins reach the stomach they get dissolved in gastric juices quickly and vitamins are dispersed/released completely in the intestine for absorption. So the vitamins, minerals, herbs, have a higher chance of being more bioavailable and bioabsorbed through gummy delivery format. Pectin based gummies are fully digestible and absorbed without any residue/side effects.
